**COOK COUNTY, IL. EMBRACES PERF GO GREEN TO 'GREEN' A COMMUNITY**  
*Company Initiates First Non-Profit Partnership with CEDA*

NEW YORK, June 9, 2008 - Perf Go Green Holdings, Inc. ("Perf Go Green") (OTCBB: PGOG, [www.perfgogreen.com](http://www.perfgogreen.com)), a marketer and distributor of biodegradable plastics, announced today that the company's new 13 gallon tall kitchen trash bags will be included in energy conservation kits for low-income families provided by the Community Economic Development Association of Cook County, Inc. (CEDA). CEDA is the nation's largest community action agency and the second largest not-for-profit organization in Cook County. This is the first non-profit partnership for Perf Go Green.

CEDA distributes over 10,000 kits per year to low-income families in Cook County, IL. in an effort to educate residents on energy conservation, energy bill cost reduction and home weatherization techniques.

"We could not be prouder to have our product used by such a worthwhile organization," said Chief Marketing Officer, Linda Daniels. "Ultimately, it comes down to education and more environmentally conscious decisions, and that's where Perf Go Green and CEDA have similar missions."

"Perf Go Green's products complement the other educational and environmentally conscious items in our kit, so this was a natural fit," added Robert Wharton, President/CEO, CEDA. "We consider our energy department a leader in the field and we are thrilled to be at the forefront of offering more families in Cook County access to smarter products and services that reduce our environmental footprint."

Perf Go Green products are made of recycled plastics that are combined with an Oxo-Biodegradable proprietary application method to produce the film for the bags. When discarded in soil and exposed to the presence of microorganisms, moisture and oxygen, Perf Go Green products biodegrade, decomposing into simple materials found in nature much faster than regular plastics, which can take hundreds of years to break down. Through this process and the use of recycled plastics, the company effectively removes plastic waste from the environment. In addition, Perf Go Green bags utilize a unique patented dispensing system that stores the bags on the bottom of trashcans and dispenses them one at a time.

Founded in November 2007, Perf Go Green premiered at the March 2008 International Home and Housewares Show in Chicago, where its products received an honor for their design quality and innovation. In addition to offering its products online, Perf Go Green is rolling out its first items in nationwide chain stores later this year.

CEDA is a private not-for-profit Community Action Agency working in partnership with Cook County communities to empower families and individuals to achieve self-sufficiency and improve their quality of life. Visit [www.cedaorg.net](http://www.cedaorg.net) for more information.
