Questions and Answers:

1. For certifications that are required for Crew Leads do they need to be completed prior to bid? example - Technician Intermediate WAP Certification / Weatherization Retrofit Installer.

Answer: No. These certifications can be completed or renewed after respondents are selected.

2. Do contractors who can provide Architectural and Mechanical get preferential treatment upon awarding the contract?

Answer: No. The awarding of contractors is only based on the selection and scoring criteria in the RFQ. Company experience will be considered in both areas. It is not necessary for a contractor to operate both Architectural and Mechanical under this RFQ, only one or the other is required. Please indicate to which you are applying. If both, please indicate as such.

3. On page RFQ page 10 #8 - License -> It states: Contractor must have a business license in a city, town, village, or municipality in Cook County and be able to act as a general contractor for Weatherization work.

Answer: You must be able to supply whatever type of license that you currently hold.
